SUMMARY

With a strong foundation in teamwork, analytic skills, and problem-solving, I bring transferable skills that support effective collaboration and project success. Through LaunchCode, I gained hands-on experience in HTML/CSS, JavaScript, and React, which I used to build a responsive website and data fetching. I am eager to apply and expand my technical skills in a dynamic environment that encourages continuous learning and professional development.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React

EXPERIENCE

Pokemon Orange — LaunchCode Capstone Project zblcustoms.com

- Developed a responsive web application using React to create an interactive Pokedex using JavaScript Fetch API to asynchronously retrieve and display detailed information from PokeAPI.
- Developed a search feature for a specific Pokemon by either their name or Pokedex number.
- Designed Pokemon cards displaying information about each individual Pokemon (eg Name, Type, and Moves.)
- Built the useState hook to manage the application's state, enabling a key feature that toggles between a Pokemon's normal and shiny sprites.
- Full Project Tech Stack: React, JavaScript, HTML/CSS, PokeAPI

MRI Technologist — North Kansas City Hospital

November 2011 - Present

- Oversee daily planning and coordination of MRI appointments, ensuring timely and efficient imaging for inpatients and outpatients.
- Communicate with cross modalities, doctors and patients to troubleshoot scan-related issues, demonstrating strong interpersonal and problem-solving abilities critical for collaborative development environments.
- Document and verify patient data and diagnosis with 100% accuracy, applying the same attention to detail and precision required in writing, testing, and debugging code.
- Adapt quickly to new imaging software and hospital systems, showcasing a strong technical aptitude and readiness to learn complex tools.

Radiologic Technologist — University Of Kansas Medical Center

June 2012 - June 2014

- Worked in the Emergency Department assisting with daily traumatic events.
- Assisted surgeons running the C-arm during complex sterile cases.
- Maintained production and quality of radiographs by following established standards and policies.
